DATE MAILED: 04/05/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/646,468	Applicant(s) KOBREHEL ET AL.	
	Examiner Phi D. A	Art Unit 3637	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 January 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-14 is/are pending in the application.
- 4a) Of the above claim(s) 4-6,9,13 and 14 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-3,7,8 and 10-12 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Election/Restrictions

1. Applicant's election without traverse of group I and figure 3 to claims 1-3, 7-8, 10-12 in the reply filed on 1/9/2006 is acknowledged.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3, 7-8, 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Anderson (5131194) in view of Cross et al (2258973)

Anderson (figures 1, 3) shows a plastic glazing panel (acrylic) comprising a generally rectangular glazing panel of transparent plastic (11, 12) having top, bottom and side edges, a retainer frame (10) defined by sections of a perimeter channel forming a corresponding generally rectangular glazing opening, the sections of the channel each having a lip (72-77) together defining an opening of smaller size than the glazing opening so as to retain the panel in the channel, the glazing panel being sufficiently thin and flexible, the receiving channel section having a resiliently compressible element (81') disposed therein allowing sufficient movement upon pushing of another edge of the glazing panel thereagainst so that the glazing panel edge opposite the another glazing panel edge clears the lip of the opposite channel section allowing removal of the glazing panel, but thereafter upon release causes the glazing panel to be repositioned to locate the another edge of the panel at an intermediate depth in the receiving

Art Unit: 3637

channel section, the element being a bow leaf spring disposed in the bottom of the receiving channel, the receiving channel section is at the bottom of the glazing opening, and further including a positioner element (81') selectively manipulatable to allow lowering of the glazing panel and thereafter hold the glazing panel another edge at an intermediate position in the channel section so that the opposite edge of the panel does not clear the lip of the channel section opposite the receiving channel section, the positioner element comprising a compressible element able to be compressed by pushing the panel another edge thereagainst, and thereafter the glazing panel is released moving the opposite edge of the glazing panel into the one channel section opposite the receiving channel section, a primary glazing panel (12) installed in the frame adjacent the glazing panel and aligned therewith but spaced to one side, the glazing panel being thinner and made of plastic to comprise a sacrificial glazing panel (inherently can be sacrificial panel).

Anderson does not show the receiving channel section being deeper than an opposite channel section.

Cross et al shows a receiving channel section (figure 9 the channel where part 8 is) being deeper than an opposite channel section to enable the easy and secured mounting of the glazing panel in the channels.

It would have been obvious to one having ordinary skill in the art at the time of the invention to modify Anderson's structure to show the receiving channel section being deeper than an opposite channel section because it would allow for the easy and secured mounting of the glazing panel in the channels as taught by Cross et al.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art shows different sash designs.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phi D A whose telephone number is 571-272-6864. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lanna Mai can be reached on 571-272-6867. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

A handwritten signature in black ink, consisting of a series of loops and a final large circular flourish.
